Thanks Rob.

John Wolfe works for LimnoTech and provides modeling support to NJDEP. My understanding is that he has been to some of the past modeling coordination meetings with EPA and CPG. NJDEP staff are not expected at the meeting.

1. Who is John Wolfe?

2. 6 CPG representatives

Rob,

Attached is an overview of discussion topics for Wednesday's meeting at HDR's office.

As mentioned during our conversation yesterday, EPA is not preparing a presentation. We do not expect that CPG will prepare one either.

John Wolfe will also attend next week's meeting with Scott, James, Ed, John, and I. We are not planning on anyone else participating beyond (maybe) Stephanie via phone.

Since the meeting will likely run through lunch, HDR said they can plan to bring lunch in. If that is of interest, please confirm CPG's head count.

Thanks,

Jen

Jennifer:

Based on our conversation from yesterday - you expect to provide the agenda/outline today. I also understand that the CPG's January 27 presentation is sufficient to cover the topics to be discussed on Feb 17.

In addition to the agenda/outline will you be providing any presentation materials in advance of the meeting?

Thank you.

Jennifer:

Please let me know the status of the outline/agenda that the Region is preparing for next week's meeting. CPG and AQ want to ensure that we are properly prepared for the meeting.

Thank you.

Thank you Rob.

We are in the process of drafting up an outline/agenda to help guide our discussion on the 17th. I'll be in touch early next week with that information and further details about the meeting room location.

Jennifer:

February 17, I expect that Alyssa, John, Peter, Pete and I will attend. Ray indicated that EPA would be sending an agenda and some other information in advance of the meeting.

Thank you.

Rob,

Thank you for sending over those items last week.

Our team can be available on February 11th (Thursday), February 16th (Tuesday), or February 17th (Wednesday) at HDR's office in Mahwah, NJ. On those days, we can be available all day with a 10 am start time to allow for everyone's travel.

I would plan on attending along with Scott Kirchner, John Kern, Ed Garland, and James Wand. It would be helpful if you could give us a head count of who will be attending on CPG's behalf so we can ensure we have a large enough room reserved.

Jennifer:

Attached is a zipfile with the Kriging mapping groups and the final version of the CPG's January 27 presentation. The CPG looks forward to meeting with the EPA and its technical consultants in early February to continue discussions on COPC mapping for the 17-mile LPRSA.

Thank you.

Rob,

Thank you for the CPG's presentation titled "An Idea to Address Uncertainty in Mapping at the RI Stage of LPR Project" provided to EPA at our New York City office on January 27, 2016.

EPA considered the meeting to be productive and as a next step would like to schedule a collaborative technical meeting. In this meeting, EPA would seek to facilitate a conversation regarding observations, concerns, and recommendations based on the CPG presentation. Our current thinking is that the meeting would be held at our contractor HDR's office in Mahwah, New Jersey in the early February timeframe. If CPG is amenable to such an approach, please let me know and we will move forward with identifying potential meeting dates and developing discussion topics. Additionally, it would be very helpful if the

CPG could send the spatial footprint of the ~26 groupings when sending over the final presentation.

For your records, I have attached a copy of the sign-in sheet from yesterday's meeting.

Thank you again for the presentation and we look forward to working on this matter further.

Regards,

Jennifer LaPoma
